#### 1. Review of Performance

#### Comparison results of current quarter and previous corresponding quarter

The Group recorded revenue of RM78.95 million for the current quarter under review representing a decrease of 5.5% over revenue of RM83.53 million of previous corresponding quarter.

The Group recorded profit before tax of RM1.39 million for the current quarter under review representing a decrease of 14.1% over profit before tax of RM1.62 million of previous corresponding quarter.

#### Comparison results of current period and previous corresponding period

The Group recorded revenue of RM331.08 million for the current period under review representing a decrease of 7.1% over revenue of RM356.29 million of previous corresponding period.

The Group recorded profit before tax of RM2.92 million for the current period under review representing a decrease of 75.9% over profit before tax of RM12.09 million of previous corresponding period.

The performance of the business segments for the current period is described as below:

#### 1) Investment Holdings Division

The Investment Holdings Division recorded a 28.6% drop in revenue as compared to previous corresponding period due to lower dividend income received from subsidiaries. Despite revenue decreases, profit before tax increased by 3 times due to an impairment loss recognised in previous year.

#### 2) Trading and Service Division

The revenue in Trading and Service Division recorded a decrease of 3.6% as compared to previous corresponding period. The decrease was mainly due to lower sales from its local subsidiaries amid weak domestic demand. However, the decrease has been mitigated by the increase sales in foreign subsidiaries and inter-companies coupled with strengthening in foreign currency.

Due to the decline in revenue, the division's results decreased substantially by 58.1% as compared to last corresponding period. The significant decline in profit was mainly attributable to the lower profit-margin, higher operating cost and decline in other operating income.

#### 3) Manufacturing Division

The revenue in Manufacturing Division has decreased by 5.3% as compared to previous corresponding period which is mainly due to lower sales demand in local and overseas market, partially offset by higher sales from inter-companies. The profit recorded a significant decrease of 43.1% which is mainly attributed to lower gross margin as a result of increased raw material and production cost.
