1. Review of Performance

Comparison results of current quarter and previous corresponding quarter

The Group recorded revenue of RM75.44 million for the current quarter under review representing a decrease of 8.2% over revenue of RM82.22 million of previous corresponding quarter.

The Group recorded loss before tax of RM1.29 million for the current quarter under review representing an increase of 539.1% over loss before tax of RM0.20 million of previous corresponding quarter.

The performance of the business segments for the current guarter is described as below:

1) Investment Holdings Division

The Investment Holdings Division recorded higher revenue as compared to previous corresponding quarter due to higher management fees received from subsidiaries. Loss before tax has reduced substantially as a result of on-going cost cutting measures.

2) Trading and Service Division

The revenue in Trading and Service Division recorded a decrease of 7.1% as compared to previous corresponding quarter. The decrease was mainly due to the slowdown of sales demand in overseas subsidiaries, further exacerbated by the strengthening in local currency. However, the decrease has been partially offset by better sales performance in the local market.

Due to the decline in revenue and lower margin achieved, the division's results decreased substantially by 43.8% as compared to last corresponding quarter.

3) Manufacturing Division

The revenue in Manufacturing Division has decreased by 33.7% as compared to previous corresponding quarter which is mainly due to the tremendous decrease in sales from intercompanies coupled with lower export sales. The division has recorded a loss representing a significant decrease of 309.5% if compared to previous corresponding quarter's profit. It is mainly attributed to lower gross margin as a result of insufficient revenue to cover fixed operating cost.
